

SHAVEEN KUMAR

MERN Stack Developer

shaveenkumarpalani@gmail.com | +91-9360674586 | Chennai, India | Open to Relocate

[LinkedIn](#) | [GitHub](#)

Professional Summary

Full Stack MERN Developer with hands-on experience building secure, scalable, and responsive web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing RESTful APIs, implementing JWT Authentication and Role-Based Access Control (RBAC), managing application state with Redux Toolkit, and designing reusable, component-based architectures. Brings a strong foundation in UI/UX design from 1.2 years of industry experience, enabling the creation of intuitive, accessible, and user-centric interfaces. Focused on writing maintainable code and delivering high-quality software solutions.

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Redux Toolkit, React Hooks, Tailwind CSS, Responsive Design, Component-Based Architecture

Backend: Node.js, Express.js, MongoDB, Mongoose, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC), CRUD Operations

UI/UX: Figma, Wireframing, Prototyping, Design Systems, Accessibility (WCAG 2.1)

Tools: Git, GitHub, VS Code, Postman, Notion, Recharts, Axios, npm

Experience

UI/UX Designer

June 2024 – August 2025

ThirdI Technologies Pvt. Ltd.

Chennai, India

- Designed responsive interfaces across 3 platforms – web, mobile, and tablet – for enterprise applications, ensuring visual and functional consistency.
- Created wireframes, user flows, and interactive prototypes in Figma for 5+ projects and features, delivering production-ready UI designs.
- Established a reusable design system and component library of 10+ components, improving design consistency and streamlining developer handoff.
- Collaborated with a 4-person cross-functional team of developers, product managers, and stakeholders to convert business requirements into intuitive digital experiences.
- Refined product designs through iterative usability testing conducted across 5+ projects prior to developer handover.
- Partnered with engineering teams on 5+ design specification handoffs, ensuring accurate implementation across all in-development applications.

Projects

CRM Dashboard – Full Stack Web Application

April 2026 – June 2026

React.js, Redux Toolkit, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Recharts

- Developed a modular CRM application covering Lead, Contact, Appointment, Activity, Notification, and User Management.
- Implemented secure RESTful APIs with JWT Authentication, password encryption, and Role-Based Access Control (RBAC).
- Integrated React frontend with backend services using Axios, handling complete CRUD operations and centralized state management with Redux Toolkit.
- Architected reusable, configuration-driven components, reducing duplicate code and simplifying

future feature development.

- Added search, filtering, sorting, pagination, bulk actions, and protected routes to enhance user experience.
- Built interactive dashboards using Recharts and structured the application with a feature-based architecture for long-term scalability.

Appointment Management System – Full Stack Application

June 2026

React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS

- Built a full-stack appointment scheduling application supporting complete CRUD functionality.
- Designed RESTful APIs for appointment lifecycle management and activity tracking.
- Modeled MongoDB collections using Mongoose to maintain efficient relationships and data integrity.
- Managed application state using Redux Toolkit for predictable and maintainable data flow.
- Connected frontend components with backend services using Axios for seamless API communication.
- Implemented input validation, exception handling, and user feedback mechanisms to improve application reliability.
- Delivered a fully responsive interface optimized for desktop, tablet, and mobile devices.

PureFlow RO – UX/UI Case Study

October 2025

Figma, User Research, Design Systems, WCAG 2.1

- Conducted user research, competitor analysis, and usability evaluations to identify user pain points.
- Mapped user journeys and information architecture to simplify task completion.
- Produced low-fidelity wireframes and high-fidelity interactive prototypes aligned with business objectives.
- Assembled a scalable component library to improve design consistency and development efficiency.
- Applied accessibility best practices following WCAG 2.1 guidelines to create inclusive user experiences.

Education

Master of Computer Applications (MCA)

2021 – 2023

University of Madras

79%

Bachelor of Science in Computer Science (B.Sc.)

2018 – 2021

Thiruvalluvar University

63%

Certifications

Full Stack MERN Development – FITA Academy

February 2026 – June 2026

UX/UI Design Crash Course – Design Decode Academy

October 2025
